PostDoctoral Research Position

Nanocellulose and Polymer Composites

The position is 1) to support ongoing nanocellulose-based research for composites, fluids, and/or energy storage materials; and 2) to conduct independent research on the subjects of mutual interest in the field of nano composite materials.

Applicants must hold a Ph.D. in polymer science, wood/polymer chemistry, material science, or a closely related field. Demonstrated analytical and writing skills are necessary. Salary will be commensurate with training and experience.
